

Shaping a comprehensive view of Customer Experience

CX Benchmarking Study

Why?

Benchmarks the experience customers perceive with **Roche vs competition**

Provides strategic perspective and helps to measure relative performance to best competitors such as Abbott and Siemens

How?

Global external agency conducts the research with more than 3000 key decision makers, both Roche and non-Roche customers. Research is double-blinded. Covers about 15 key markets

[Link to 2025 report](#)

Customer Relationship Research

Why?

Measures relationship health & gathers insights on **customer priorities** enabling follow-ups to address risks & capture opportunities.

Functions as a strategic **tool for top-account engagement**.

How?

Affiliates survey or interview key decision makers at top accounts.

≈ 2,200 responses from 50 markets were collected in 2025

[Link to 2025 report](#)

Connecting what is happening in the market with why it's happening for our own customers.

Executive Summary - Combined insights from Global CX Benchmarking & Customer Relationship Research

Confirmed market & customer leadership

Confirmed #1 position shared with Abbott¹, reinforced by a strong **NPS of +49 from our customers**, built on a "Foundation of Trust"

Customers advocacy and **purchase decisions** are impacted most by Products & Solutions (#1) and Service & Support (#2) - Roche is leading in these areas²

Commercial impact: Promoter (high NPS) accounts are more likely to renew contracts³

Elevating a strong partnership into a strategic advantage

Strong partnership perception: 89% of customers see Roche as a "true partner". Roche has a strong brand perception of being "reliable and keeping its promises"⁴

The C-Suite gap: Executives seek a more strategic partnership aligned with their two primary business priorities:

- **Driving efficiency** with automation and AI to manage costs and labor shortages
- **Accessing innovation** and new technology to fuel future growth

Key watch-out: Siemens holds a stronger position (NPS) with executives⁵

Opportunities to extend our operational leadership

A market differentiator:

Our leadership in science and excellence in Service are core strengths that outperform competitors⁶

Inconsistent execution:

Customer feedback points to frictions in service (recurring issues) and supply chain (delivery, packaging, expiry)

The communication gap:

Customers perceive a lack of proactivity and transparency in our transactional communication (e.g., along ordering, service and sales processes)

Identified priorities to extend our CX leadership

Win the C-Suite by leveraging trusted KOLs and peers, and by presenting solutions directly aligned with their core business priorities

Solidify operational excellence by addressing the root causes of service and supply chain friction to ensure a consistently reliable experience

Enhance transactional communication along all interactions with customers (esp. in sales) to build trust through transparency.

'Stay close' to competitors' strategy and monitor movements to inform our competitive selling initiatives (esp. Chinese competitors)

Global Customer Relationship Study

51 markets | 2,180 responses

Understanding customers' relationship with Roche,
what matters most now and for the future.

Contents

1. Why relationships matter & today's state ([p.5-9](#))
2. Customer needs for future growth ([p.10-12](#))
3. Loyalty variations across segments ([p.13-17](#))
4. Customer journey improvements ([p.18-27](#))
5. Impact of CRR ([p.28-32](#))
6. Summary ([p.34](#))
7. Appendix ([p. 35-38](#))

1. Why relationships matter & today's state

Customer relationships matter because they drive loyalty and real commercial impact

Strong link between loyalty and commercial metrics¹

90%

Promoter accounts renew 90% more often than Detractors

53%

Promoter accounts have a 53% higher win rate than Detractors

58%

Promoter accounts generate ~58% of the revenue

and in own customers words²...

*Over the 18 years of collaboration, I have been satisfied with the quality, durability of the equipment and reliability of Roche products, but the **people** I have interacted with are the **main reason** I recommend Roche*

*I did not buy from an equipment seller - I built a **partnership** with Roche - My Roche contacts are reliable **people I trust***

*The **relationship** with Roche Diagnostics **goes beyond** the one included in the agreements. We are partners with whom we have been working together for many years.*

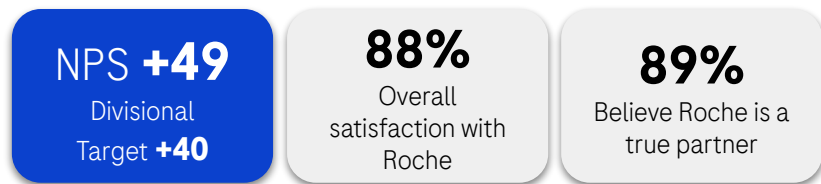

¹Internal study used data from UK market: Relationship survey (2019-2024), Revenue (excl COVID) (2019-2024), Sales Opportunities (2018-2024) and Contracts (1998-2033)

²Customer quotes from Customer Relationship Research 2025

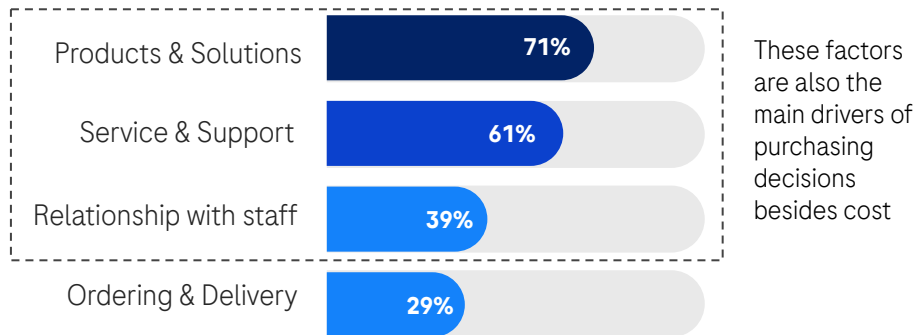

Strong relationships, with opportunities to strengthen operations, communication, and future growth

Key metrics

Top influencers of NPS¹ by relative importance

Key qualitative themes

Drivers of loyalty

Reliable products and accurate results provide a strong foundation of trust.
Local teams' responsiveness and **expertise** strengthen partnerships.

Experience along the customer journey

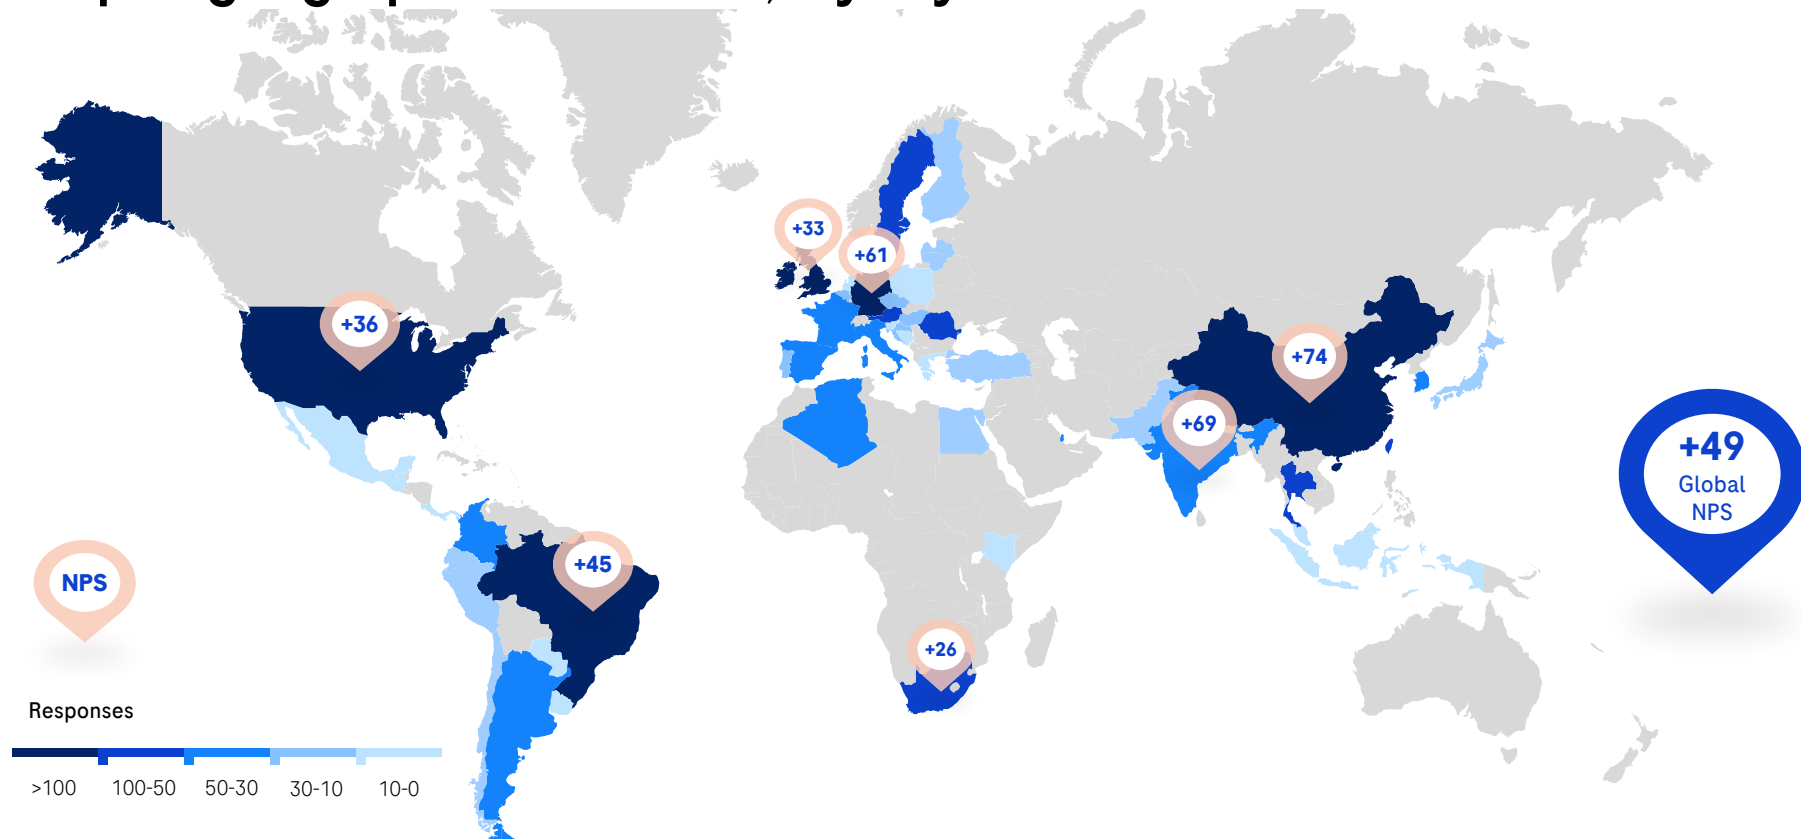

Service is highly valued, though some note **frictions in resolution** quality and **delivery**.
Customers also ask for more proactive communication, especially around new products and updates.

Future needs

Facing growing pressures, labs seek simpler, automated, and digital solutions and expect Roche to act as the partner for **enabling future growth**.

Despite geographical variance, loyalty drivers are consistent across

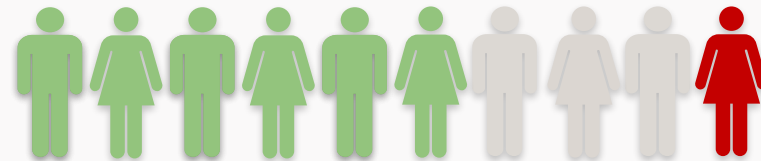

Roche

Based on 2,636 responses¹ collected between April 1st and Sep 1st, 2025 across 51 countries. Full list of participating countries and NPS can be found [here](#). A small portion of countries' data collection is still ongoing. This includes UK&IE (456 responses) via a different study and will therefore not be included in the subsequent analysis of the CRR. Their NPS for 2025 is +33. Total responses excluding UK&IE=2,180

Customers praise our people and products but highlight areas to improve¹

60% of our customers would recommend Roche;
only **8%** would not

Promoter themes

Exceptional People

Professional sales & account teams
Collaborative partnerships
Expert tech. support

Product Quality

Instrument reliability
Assay performance
Trustworthy results

Advanced Technology

Automation & efficiency
Innovation
Ease of use

The people represent the main reason

The products deliver on their promises

For me Roche is a Ferrari in the lab

Detractor themes

Product & Tech Issues

Frequent failures
Inappropriate expiry dates and package sizes
Frustrating software

Inconsistent Support & Logistics

Slow service response
Recurring issues
Delayed supplies & parts
Poor communication

'instrument error' after multiple repairs *Reagents expiring in 60 days* *continuous issues with deliveries*

2. Customer needs for future growth

Customers link transparent and proactive communication to their ability to plan ahead, innovate and grow

How customers ask us to improve communication¹

Greater transparency in issue resolution & progress

More frequent updates on new product & solutions

Personalised check-ins to understand needs

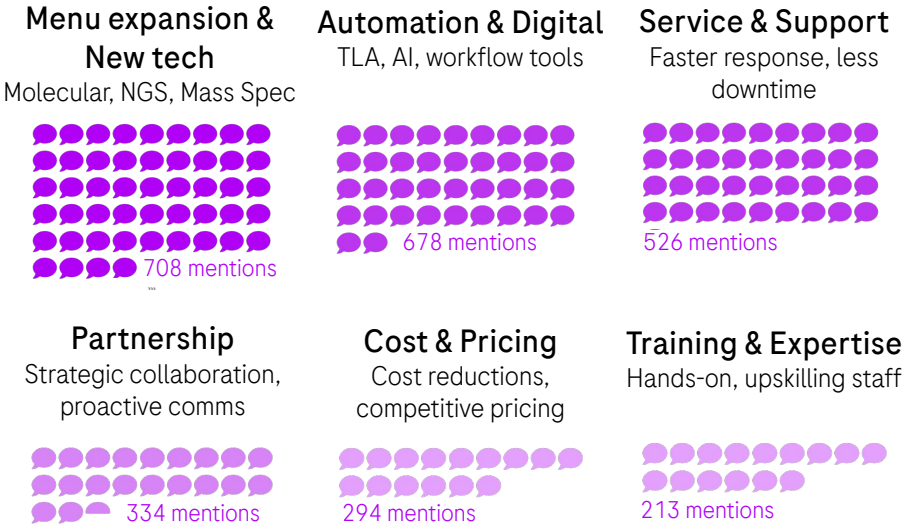

More collaboration & feedback opportunities

If the laboratory isn't aware of alternative solutions to work faster, it doesn't have the opportunity to fight to acquire them.

What matters most for their future growth²

¹Question: In which areas could Roche improve its communication to better meet your needs? Multichoice, 1,748 responses ²Questions: a)What are your top priorities for growth and success over the next three years? Open text , approx 1650 comments. b)What's the one thing we could do that would make the biggest impact on your organisation's success?, Open text, approx 1660 responses. Speech bubbles represent proportional count of mentions of most common themes, 1 customer comment may have multiple themes. Themes were derived using AI-assisted analysis; while themes are accurate, the exact number of mentions may not be exact.

Customers want digital solutions but integration and staff readiness block adoption

59% of customers want to explore optimising their lab workflows,

and while **44%** are interested in digital solutions¹ to drive efficiency and growth they face **major barriers**²

The biggest barriers are system integration, staff adaptation. Despite these, we're committed to advancing digital solutions because of their long-term value

IT & System integration

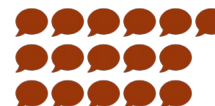

Incompatibility with existing LIS/HIS systems, poor connectivity

281 mentions

Staff

Insufficient staff training, resistance to change, skills gaps

221 mentions

Implementation

Long setup, complex config, weak tech support

220 mentions

Cost & Budget

High costs, limited budgets, approval challenges

163 mentions

Data security

Strict regulations, internal IT barriers, data policies

72 mentions

Understanding

Low awareness of Roche's solutions, low adoption due to complexity

60 mentions

¹Question: Which topics would you like to explore further with us to support the growth of your organisation? Multichoice , 1,870 responses

²Question: What barriers have you faced in adopting digital innovations, such as clinician decision support tools or enhancing lab operations? Open text, approx 1242 comments. Speech bubbles proportionally represent most frequent themes. 1 customer comment may have multiple themes. Themes were derived using AI-assisted analysis; while themes are accurate, the exact number of mentions may not be exact.

3. Loyalty variations across segments

- Lab size
- Persona

Large labs are less likely to recommend Roche...

Small NPS +50
<500K | 20% of business

61% promoters

Key Gain point: Immediate, competent local support – critical with no backup equipment.

Key Pain point: Reagent waste caused by oversized kit packaging and short-expiry dates

Main Priority: Cost-effective solutions and expanding test menu while adopting new right-sized solutions.

Medium NPS +52
500K-2M | 30% of business

58% promoters

Key Gain Point: Strong technical partnership – fast, expert troubleshooting and scientific support.

Key Pain Point: IT/Software complexity (Navify, LIS integration) slow workflows.

Main Priority: Drive automation and efficiency to manage growth with limited staff.

Large NPS +40
>2M | 50% of business

53% promoters

Key Gain Point: Reliable quality and performance that sustain high-throughput operations.

Key Pain Point: Extended downtime caused by delayed parts and service staff shortages

Main Priority: Standardize and digitalize (AI, DP, predictive analytics) for efficiency at scale.

Categories are based on 2024 revenue. Customers were grouped by annual revenue: Small (<500K, 30% of sample), Medium (500K-2M, 30%), and Large (>2M, 40%). Portion of business was determined by these categories, eg.: for Large, accounts with 2m revenue or more in 2024 made up 50% of all business. Total sample: 1,649 responses. Pain points, gain points and priorities are based on open-text comments from these customer segments.

China is not represented due to restrictions in accessing revenue information. US represents the biggest portion of the Large category. Excluding the US lowers the gap between tiers but difference remains, Small and Medium sites have a higher likelihood to recommend than Large sites

...because operational inconsistencies can often turn into major failures

Sources of inconsistencies¹

Product Performance

Great quality and reliability of instruments and tests
BUT face frequent breakdowns of automated lines and newer instruments

Service

Knowledgeable, professional local teams
BUT delayed spare parts, under resourced teams and global escalations extend downtime

Logistics

Easy ordering process
BUT unreliable supplies, delivery delays and lack of proactive comms

Digital

Customers are excited about Roche new digital tools
BUT software can be difficult to integrate and face complex IT and security barriers

Areas to focus on²

Address operational frictions

Support labs with more predictive service, faster access to parts, and after-hours expertise to minimize disruptions.

Enhance transparency

Provide early visibility into reagent supply issues and delays so labs can plan workflows and avoid last-minute crisis.

Elevate the digital experience

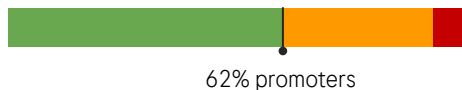

Bring the customer voice by identifying barriers to adoption and co-developing improvements that both remove friction and build collaboration.

¹Themes are derived from open-text feedback on specific touchpoints by large lab customers eg.: What do you most value about Products & Solutions, What do you find most challenging about Service & Support?

²Themes are derived from open-text feedback on future need questions provided by large labs. Total comments 4,755.

Executives are less likely to recommend Roche...

Lab Managers NPS +53

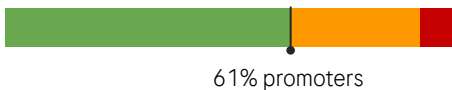

Key Gain Point: Quick, professional, reliable local technical support and sales rep

Key Pain Point: Frequent instrument downtime/breakdowns

Main Priorities: Maintain quality and workflow efficiency with full automation

Lab Directors NPS +55

Key Gain Point: Accurate, reliable assays and strong technical expertise.

Key Pain Point: Inadequate staffing, managing operational complexity and IT barriers

Main Priorities: Standardize systems, reinforce quality, and adopt digital tools for oversight.

Executives NPS +42

Key Gain Point: Roche's strong brand, product quality, and reliability

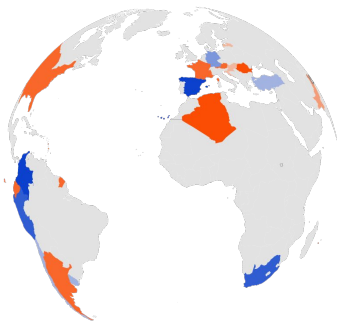

Key Pain Point: High costs, slow processes, and perceived loss of strategic partnership

Main Priorities: Drive efficiency and growth through digitalization, automation, and AI.

...and they wish for more engagement and strategic partnership

NPS gap varies across the globe

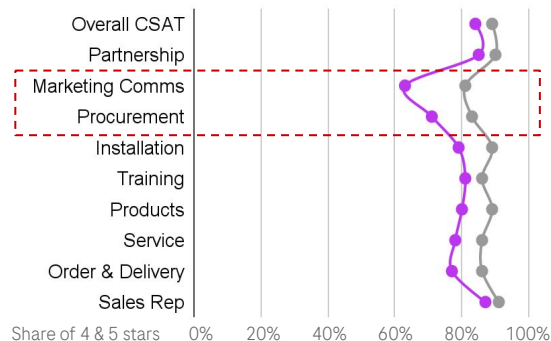

Overall, **executives** are less likely to recommend Roche than non-executives in 50%+ countries¹
NPS **+43** vs +53

Widest negative gap:
Algeria, Argentina,
Austria, Ecuador,
France, Romania, USA

Widest positive gap:
Spain, Colombia, Peru,
South Africa

Customer journey: **Executives** vs Non-Executives

Most significant differences:

Marketing comms: Executive dissatisfaction stems from wanting a stronger strategic partnership, requiring early, transparent information on Roche's future pipeline and market strategies (e.g., AI, Digital Pathology).

Procurement: Executive frustration is driven by Roche's perceived slow, bureaucratic structure, which causes contracting delays and limits negotiation of flexible, competitive pricing crucial for long-term viability.

Key impact areas for future success

Efficiency & Scalability

Help them manage growth and control costs with automation solutions, workflow consulting, and inventory tools to improve TAT

Access to Innovation

Enable them to stay competitive with advanced tech, digital pathology, AI-driven workflows, and expanded menus.

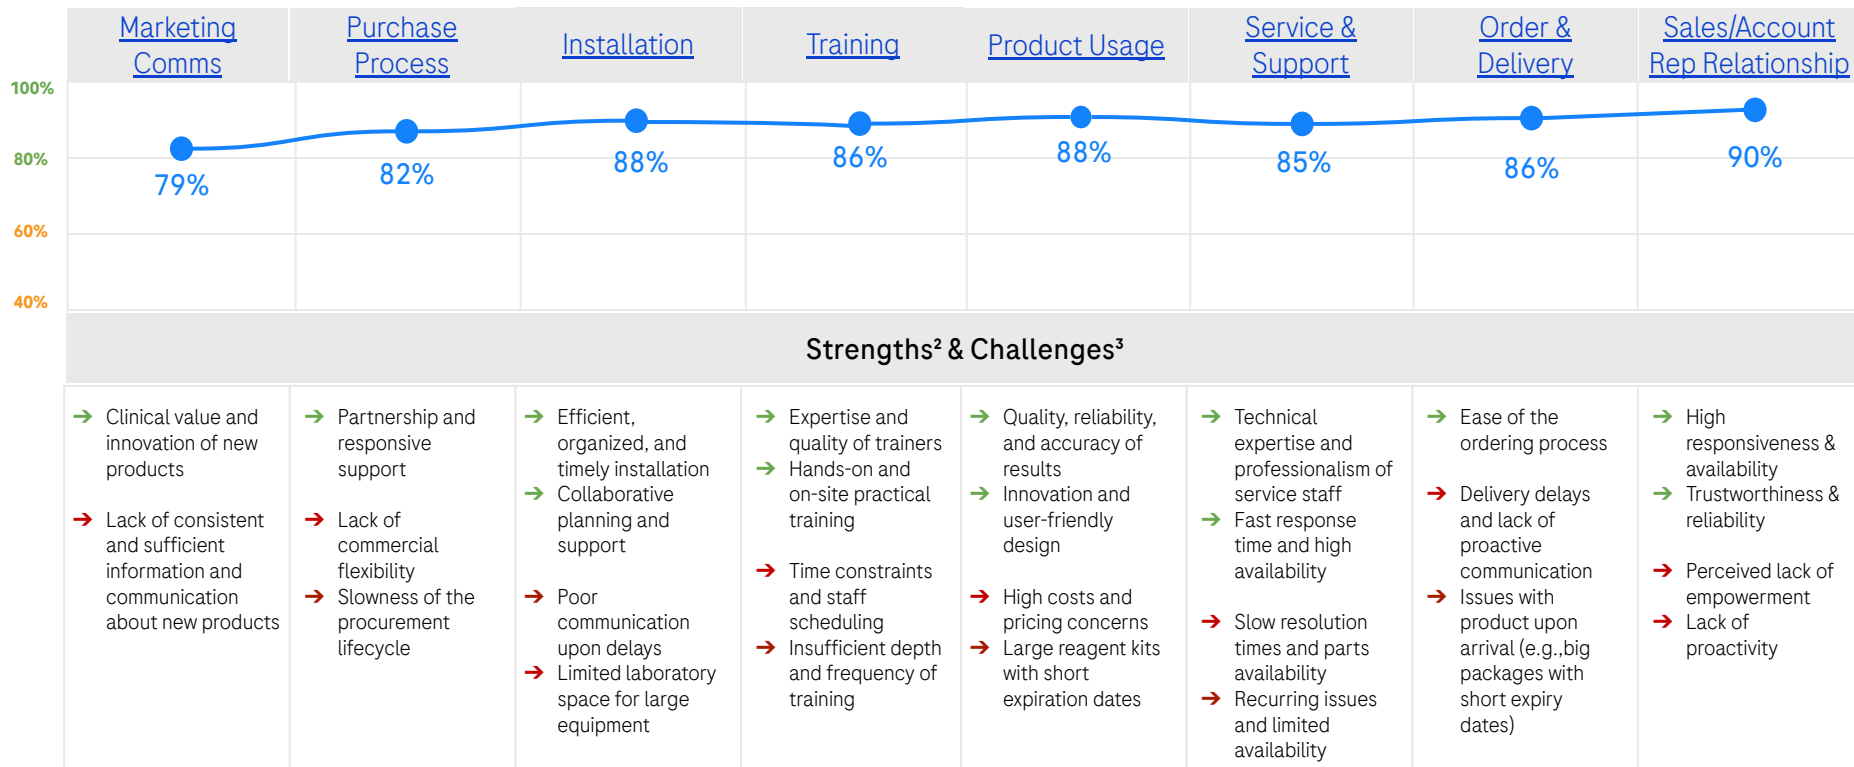

Strategic & Flexible Partnership

Strengthen partnership with transparent innovation pipeline, faster contracting, flexible commercial models and co-development opportunities

4. Customer journey improvements

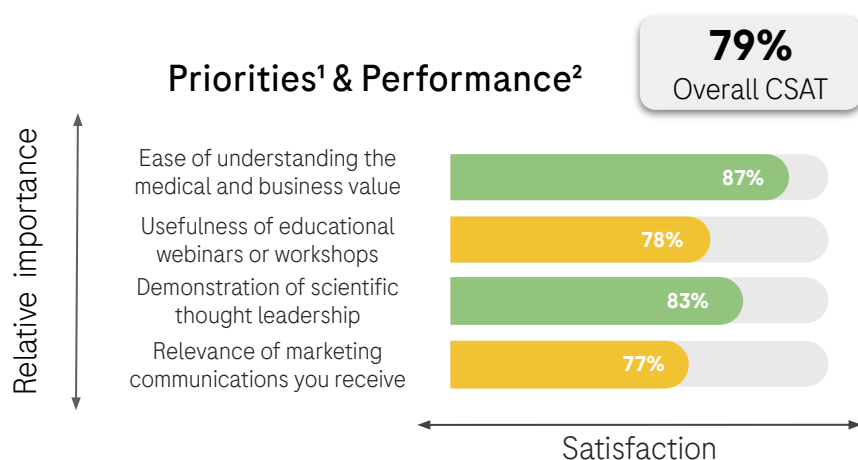

Overall experience along the customer journey¹ is high with opportunities to improve

¹Question: Please rate your experience with the following interactions you or your organisation had with Roche in the last 6-12 months. (Rating 1-5)

²Question: What do you value most about...? ³Question: What do you find most challenging about...?

Marketing communications - Valued updates with opportunity for more proactive communication

Customer Voices

This is precisely a difficulty because we lack communication. No proactive communication, no information on new products, no dedicated sales representative. It's difficult to have a contact person when you have a request for information or a price

We appreciate regular meetings where new products and solutions are presented. It's good that these have resumed. For a period we missed these opportunities. We want to keep up to date and know what's coming!

Qualitative themes³

Continue Doing

Highlighting clinical and innovative solutions: Customers value updates on new tests, pipelines, and technologies like AI, and want more regular, proactive communication to stay ahead of clinical and market trends.

Providing clear product information: In-person presentations and seminars are praised for clarity and interactivity, while emails work well for quick updates but less so for complex details.

Opportunities for Improvement

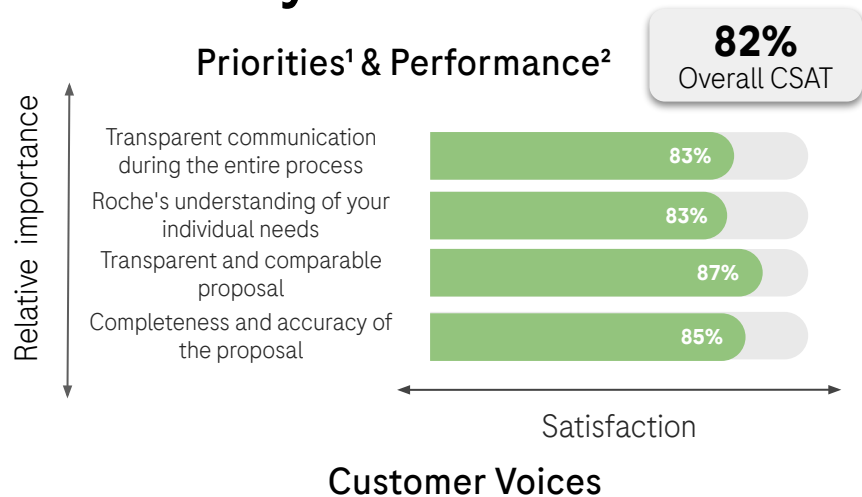

Strengthening clinician buy-in with evidence-based materials. Staff need resources that clearly connect technical features to clinical benefits.

Ensuring timely and consistent product updates. Information on recalls, lot changes, or new products often arrives late, unclear, or misdirected, disrupting operations.

¹Question: When evaluating the Roche's communications about new products and tests, what are the three most important factors for you?²Question: How satisfied are you with each of the following attributes? [previously chosen factors]

³Themes are based on comments provided when asked to explain their main challenges and most valued aspects of the communication they receive about Roche products

Procurement process - Seen as transparent but slowed by inflexibility

They were very helpful in answering the questions, providing insight into what was needed. Transparent in what could and could not be done or accomplished

Faster response times and a more streamlined proposal process would greatly improve the experience in future dealings

Qualitative themes³

Continue Doing:

Building transparency and partnership in procurement. Customers highly value the transparency, responsiveness, and open communication they receive during the procurement process. They appreciate quick responses and the willingness to help them define and meet their needs.

Opportunities for Improvement:

Enhancing commercial and contractual flexibility. Customers feel the procurement process is often inflexible, with rigid pricing. This lack of flexibility makes it difficult to align with their internal processes and budgetary constraints.

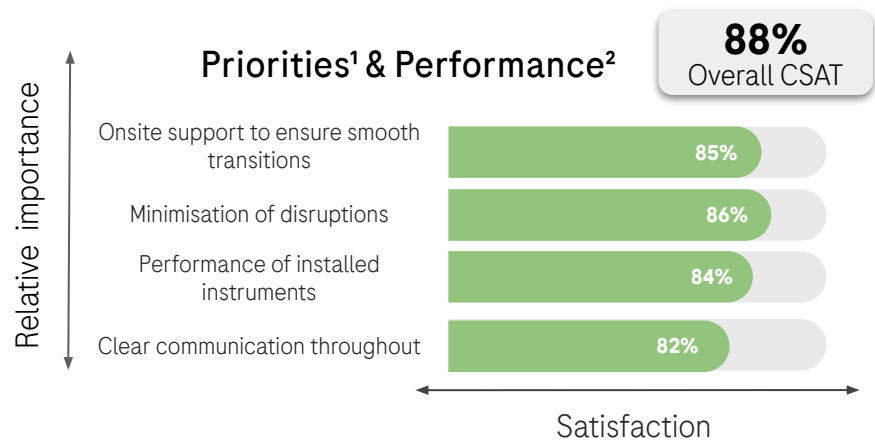

Streamlining the procurement lifecycle to reduce delays.

Customers report that the overall procurement process can be very slow, from receiving proposals to finalizing contracts.

¹Question: When evaluating Roche's procurement process what are the three most important factors for you? ²Question: How satisfied are you with each of the following attributes? [previously chosen factors]

³Themes are based on comments provided when asked to explain their main challenges and most valued aspects of their procurement process with Roche

Installation - Runs smoothly, though coordination and space create challenges

Customer Voices

The process was smooth and well-coordinated. The Roche team was professional, punctual, and provided clear guidance throughout the installation

Install team seemed rushed and like they were all strangers to each other.

Qualitative themes³

Continue Doing:

Delivering efficient and well-organized installations Customers praise professional, punctual, and well-organized installation processes that minimize disruption to daily lab operations. The expertise, friendly demeanor, and collaborative nature of the installation team are highly valued.

Opportunities for Improvement:

Improving communication and coordination between teams.

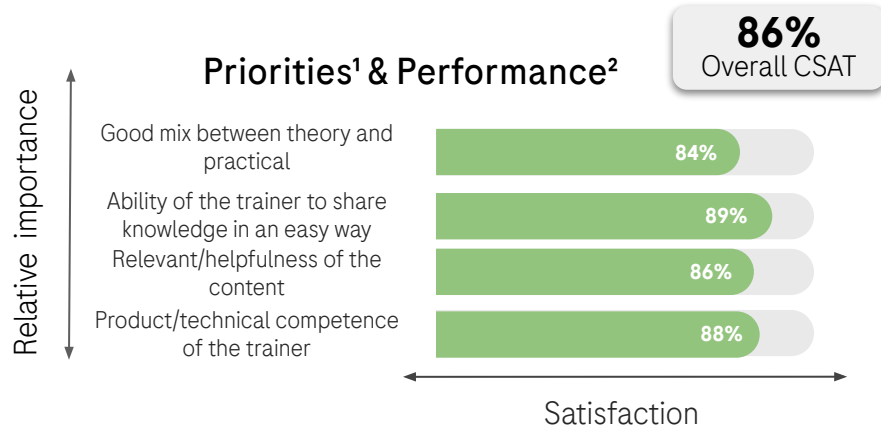

Customers report a lack of clear communication between Roche's internal teams, which can lead to important information being lost or overlooked, causing delays.

Addressing space and infrastructure challenges early. Labs frequently struggle with limited physical space for large equipment, a challenge often not addressed during pre-installation inspections. Delays are also caused by issues with a lab's own IT department

¹Question: When evaluating an equipment installation from Roche, what are the three most important factors for you? ²Question: How satisfied are you with each of the following attributes? [previously chosen factors]

³Themes are based on comments provided when asked to explain their main challenges and most valued aspects of their installations with Roche

Training - Trusted and effective, with opportunities to expand access and depth

Customer Voices

The training is well-structured, easy to follow, and hands-on. It covers both theoretical and practical aspects, which helps our staff feel confident using the equipment. The trainers are knowledgeable, patient, and always ready to answer questions

The training did not address QC... There was also NO training on the middleware and that is a huge demerit

Qualitative themes³

Continue Doing

Leveraging expert trainers for practical, on-site sessions. The expertise and quality of Roche's trainers are consistently praised, especially during in-person sessions that are practical and tailored to specific needs and workflows

Offering advanced training and updated scientific knowledge. Customers appreciate access to information on new advancements and scientific topics, which helps them stay updated and improve their skills.

Opportunities for Improvement:

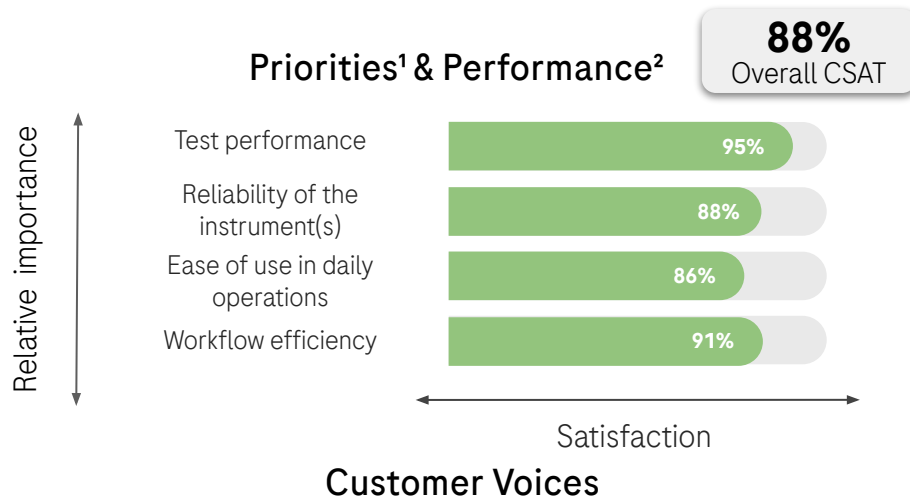

Expanding training frequency and accessibility. Time constraints in 24/7 labs make it difficult to train all staff; customers ask for more refresher sessions and accessible online options.

Providing more in-depth and practical training. Some find sessions too superficial and want advanced troubleshooting skills with a stronger balance between theory and application.

¹Question: When evaluating Roche's training, what are the three most important factors for you? ²Question: How satisfied are you with each of the following attributes? [previously chosen factors]

³Themes are based on comments provided when asked to explain their main challenges and most valued aspects of their training with Roche

Products & Solutions - Reliability drive trust, yet costs and software create friction

*Powerful and reliable solutions (instruments) that are therefore reassuring...
The team is very satisfied with the quality control results, very reliable results
(judged 'rare' at this level)*

*To fit Roche's costs within my budget. To balance Roche's costs with what I have
approved in the budget*

Qualitative themes³

Continue Doing:

Delivering reliable and high-quality products. Customers praise the stability, accuracy, and reliability of Roche's products, which builds confidence. The broad test menu and automated features are also highly valued.

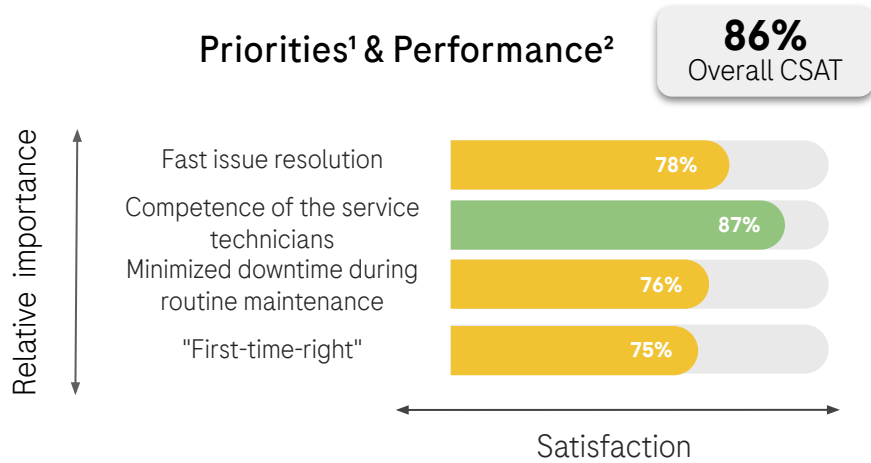

Introducing user-friendly innovations. Customers appreciate "ready to use" products and their compatibility with their instruments, reducing preparation time. Customers also value innovation that improves workflow efficiency.

Opportunities for Improvement:

Making product offerings more flexible and cost-effective. High costs and large reagent pack sizes create waste and financial pressure, especially in lower-volume labs.

Resolving recurring software and hardware issues promptly. Customers report cumbersome software, hardware downtime, reagent stability concerns, and unexpected QC failures.

Service & Support - Expert teams are valued, recurring issues erode confidence

Customer Voices

The technical staff are all very competent. No matter how difficult the problem is to solve, the staff always find a way to do so.

Many times the problem keeps repeating, so it wasn't solved at the root, it goes back to work and the next day presents the same problem

Qualitative themes³

Continue Doing:

Demonstrating expertise and professionalism. Customers praise knowledgeable engineers who often resolve issues on the first visit.

Providing fast response and availability. Many highlight quick communication, rapid dispatch, and remote tools that help minimize downtime.

Opportunities for Improvement:

Improving resolution consistency. While many issues are fixed quickly, others are delayed by spare part shortages, repeat visits, or hotline procedures that feel unnecessary for experienced staff.

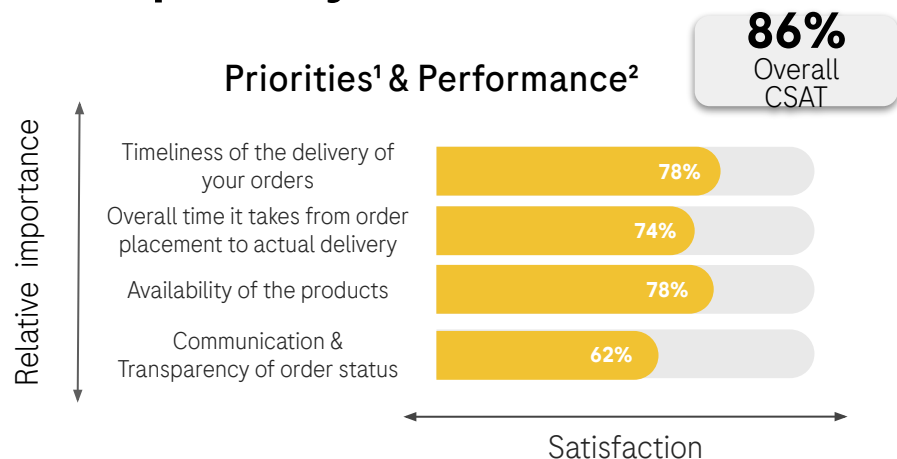

Ensuring consistent quality. Customers report recurring problems without root-cause fixes and variability in technician expertise.

Expanding support and transparency. 24/7 labs struggle with limited off-hours coverage and unclear updates on global escalations, especially larger labs.

¹Question: When evaluating Roche's service and support, what are the three most important factors for you? ²Question: How satisfied are you with each of the following attributes? [previously chosen factor]

³Themes are based on comments provided when asked to explain their main challenges and most valued aspects of their service & support experience

Ordering & Delivery - Easy ordering, though delivery reliability and transparency need attention

Customer Voices

The products have short shelf life. There is bias between lot to lot reagents

You only receive communication on an item that is out of stock when you follow up after not receiving the item. It would be better if they informed you before the time or when ordering.

Qualitative themes³

Continue Doing:

Ensuring speed and punctuality: Many customers highlight fast turnaround, with deliveries often arriving overnight or on the promised date, which helps maintain smooth lab operations.

Simplifying ordering and tracking: Ordering systems like Navify, Webshop, and EDI are valued for being intuitive and transparent, giving customers visibility and ease of use.

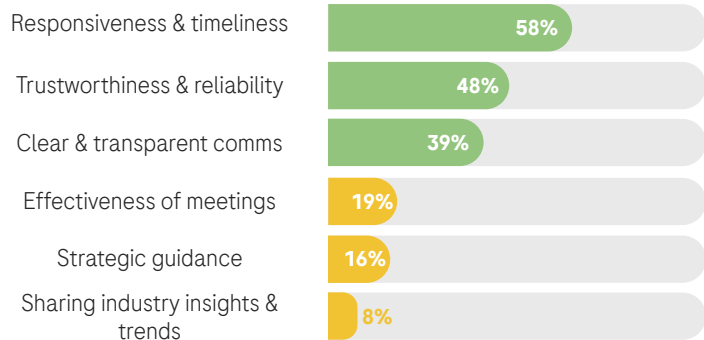

Opportunities for Improvement:

Improving delivery reliability and transparency: Despite many positive experiences, some customers report delays, backorders, and partial shipments that disrupt operations. They ask for earlier alerts on shortages and clearer, more reliable ETAs.

Ensuring product integrity on arrival: Customers describe challenges with short expiry dates, split or incomplete deliveries, and oversized packaging that complicates receiving and storage.

Relationship with sales/account rep - Exceptional interactions with perceived lack of empowerment

Most & Least valued aspects¹

90%
Overall CSAT

Customer Voices

Anytime I have a question or need her help with something, she is right there ready to help

Your front line staff are GREAT... The problem is Roche does not empower them to make decisions

Qualitative themes²

Continue Doing:

Maintaining high responsiveness and availability. Customers praise representatives for being accessible and providing rapid support, especially during urgent situations, with quick replies by phone or email.

Building trust through reliability and follow-through: The best representatives are seen as committed partners who go beyond routine transactions and ensure issues are fully resolved.

Opportunities for Improvement:

Empowering representatives to act independently: Customers believe their representatives are personally capable, but are often restricted by rigid processes and internal hierarchies that slow decision-making.

Increasing proactivity in engagement: Some relationships feel reactive, with reps stepping in only when problems arise rather than anticipating needs, sharing strategic insights, or ensuring prior commitments are met.

¹Question: What do you most value about your relationship with your sales/account representatives? Please select up to three. ²Question: What specific actions could your sales/account representatives take to better support your organisation and strengthen your relationship?

5. Impact of CRR

How China is using the CRR to shape their 2026 strategy

High engagement

289 responses, **97% response rate** – among the highest globally

Results shared across sales, marketing, commercial, legal, strategy, digital, service, and LT

Cross-functional alignment

Teams translated insights into actions for each function focusing on:

Strengths: service and product quality, relationships

Challenges: pricing, pace of new releases, availability of service staff

Insights driving next actions

Based on customers' top future priorities: Digital transformation & Lab efficiency

1. Optimize Lab Performance
2. Precision Service Model - different tiers for customer segments
3. Strengthen clinical value communication

Enhancing the TOP account experience through CRR helps better secure China's business

How Brazil is using CRR to drive action

1 Listen to Customers

Brazil conducted in-depth CRR interviews with strategic accounts to assess relationships and capture key feedback.

2 Turn Insights into Strategies

They identified systemic challenges and defined high-level initiatives together with cross-functional leadership to drive improvements.

3 Plan with Accounts

Brazil developed account reports, collaborated with account teams to prioritize actions, and formalized objectives, impact, owners, and timelines.

4 Close the Loop

Finally, they shared findings and action plans with customers and validated next steps, which reinforced transparency and strengthened partnerships.

Organisation-wide structural actions

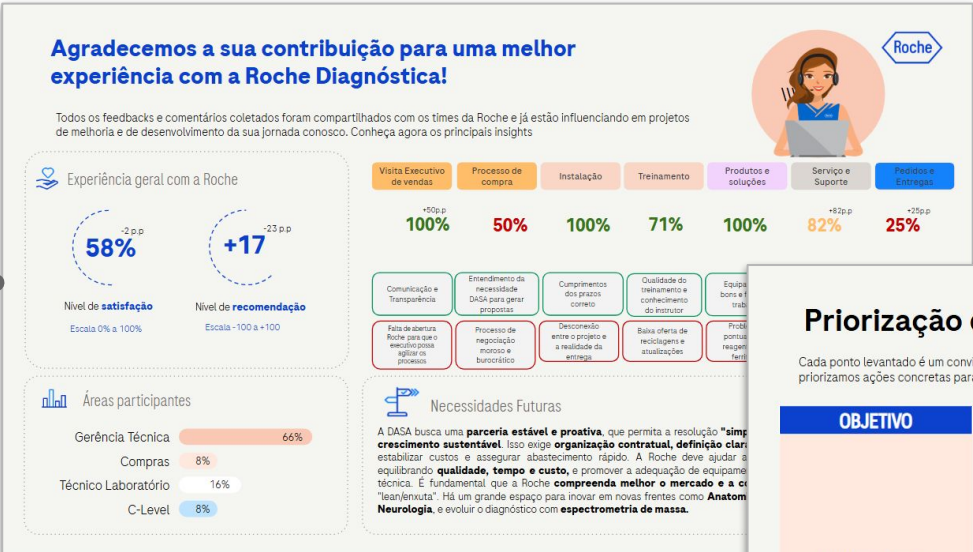

These are impactful changes applied across the entire organization. They are designed to deliver immediate results by addressing common inefficiencies or pain points.

Account Level Actions

These are specific, targeted initiatives focused on an individual client account. The goal is to improve the relationship, increase revenue, or address unique challenges for that specific client.

Brazil - Closing the loop with key accounts

Action plan

Priorização das ações

Cada ponto levantado é um convite para aprimorarmos ainda mais nossa parceria. Reconhecemos que existem áreas onde podemos fortalecer nossa atuação e, por isso, priorizamos ações concretas para transformar esses desafios em oportunidades tangíveis para o seu negócio.

OBJETIVO	AÇÃO	IMPACTO	PRAZO	RESPONSÁVEL
Fortalecer a parceria estratégica, por meio da entrega de soluções colaborativas, plenamente alinhadas às necessidades e expectativas do cliente. CRR Insights summary

6. Summary

Summary - 1,000 hours of customer listening to guide our focus areas

Foundation of trust

Customers rate Roche highly for reliable products and professional staff. With an NPS of +49 and 89% seeing us as a true partner, trust in our people and solutions is our biggest strength

Segment-specific approaches

Needs differ by size: small labs want cost-efficient solutions, medium labs seek automation to manage growth, and large labs expect digitalisation at scale – yet are less likely to recommend Roche, so extra focus is needed

Win the C-Suite

While quality is recognized, many executives perceive Roche as transactional. To win the C-Suite, we must position ourselves as a strategic partner, enabling efficiency and access to innovation

Close the communication gap

Proactive, transparent updates on orders, service, and innovation are critical. Customers want early insights to better manage operations and plan long-term

Solidify operational excellence

Recurring service and supply issues slow customers down (especially large labs) and lower loyalty. Procurement is also seen as slow and inflexible. Greater speed and agility across operations are critical to maintain leadership

Enable future growth

Labs see strong potential in digital and AI-driven solutions, but face barriers with IT integration, budgets, and staff readiness. Roche can unlock adoption by reducing complexity, co-developing solutions, and supporting change management

Immediate next step:

Strengthen communication channels between global and local teams so ongoing initiatives are visible, insights are shared both ways, and customers feel the impact.
